Focus Group Minutes (1)

The SIGN2Inclusion project was introduced to ten participant, nine deaf (DHH) and one hearing who works with deaf people.

they enthusiastically participated in the interview thinking that with their answers they can make a great contribution to the deaf community and especially to the students who are the future of the generation.

After the presentation of the project, the partners involved were impressed by this European project involving three countries and six different languages (three sign languages and three spoken languages) and especially proud to see that deaf people are actively involved in the project, congratulating the partners (ANPES, CIP, UNITO, RITE, IST and the CNRS).

Focus Group Minutes (2)

Participants highlighted the importance of creating neologisms related to climate change and emerging technologies as they have become part of everyday conversation, emphasising the importance of the involvement of the signatory community as subjects in the use of this language.

They also emphasised that they do not seek 1-to-1 translation and creation of concepts and respect the normal process of creating neologisms in their language, i.e. French Sign Language.

Focus Group Minutes (3)

After the interview, they also emphasised the importance of full accessibility of the questionnaire, which was presented in two languages (LSF and French).
